About Me

Dedicated Assistant Professor in the Commerce department with a strong passion for fostering analytical thinking and innovation among students. Skilled in delivering in-depth knowledge of data analysis and programming techniques. Committed to mentoring students in research and practical applications of data science concepts. Aiming to contribute to the academic growth and success of the institution.

Professional Experience

DESIGNER / JP STUDIO
2017-2020

Key responsibilities:

- Image selection: Choose images that align with the brand image and editorial mission
- Image editing: Use photo editing software to enhance and retouch images
- Image management: Organize and maintain the image library
- Project management: Manage photography projects, including scouting locations, procuring props, and managing photo shoots
- Collaboration: Work with photographers, editors, designers, and other teams to ensure alignment
- Quality assurance: Ensure that all designs meet quality standards and are visually consistent
- Communication: Communicate designs and concepts to clients and art directors
- Documentation: Handle photography paperwork and create and maintain image guidelines
- Team management: Hire and supervise staff and freelance photographers, models, and other crew
- Vendor management: Negotiate fees and monitor the quality of services provided by printers, freelancers, and other vendors
- Photo designers should have a thorough knowledge of computer imaging, photographic techniques, studio management, and color composition. They should also have a creative mind, an eye for detail, and storytelling skills.
